

As a technology service provider, we support companies in marketing their products efficiently online. For this purpose, we offer our customers a highly available SAAS application, including white labelling. Our goal? To enable our customers to carry out high-performance online marketing. As a member of our small, agile team, you can have a direct influence on our technology and the associated results.

## Application Engineer Backend (m/f/d) part- or full-time (remote possible)

### Your tasks

- You support the team in the planning, conception and development of web APIs and services for innovative and web-based applications
- Whether design, implementation, test or integration - you are part of all project phases
- As part of a small team, you develop technologically sophisticated solutions

### What you bring

- Whether you have a degree with a focus on computer science or a comparable education - you score points with your technical interest and understanding
- You do not only support the team with your coding skills, but also bring it forward with new ideas
- Our tech stack (a.o.):

Vue.js

Laravel

GIT

MariaDB

Google BigQuery

REST-API

## What we offer

We want you to be part of our team for the long term - with a permanent position and an exciting, challenging job.

creative freedom through flat hierarchy and the transfer of responsibility

free choice of development environment and hardware

flexible working hours

free choice of workplace: in the center of Nuremberg's old town or remotely

regular team events

**We look forward to receiving your CV!**
